Notice Regarding Drawings: Formal drawings are now required.

Reasons for Allowance

Claims 2-7, 9-11, 14-17, 19-22 and 26-28 are pending. Claims 10, 14, 19 and 22 are independent. Claims 2-7, 9, 11, 15-17, 20-21 and 26-28 are dependent. The closest identified prior art references are: (1) U.S. Patent 3,975,876 to Sauder; (2) U.S. Patent 5,261,849 to French; (3) U.S. Patent 1,155,523 to Smith; and (4) U.S. Patent 4,094,090 to Walmer.

Claim 10: Claim 10 is addressed to an interchangeable panel display system. The system includes a rectangular frame having a pair of parallel posts mounted at two adjacent corners of a base, each post having a longitudinal inwardly facing groove and beam spanning upper ends of the post and having a slot therethrough. At least one wall panel is removably received in the grooves on the frame and includes a decorative cover with a magnetically attractable layer disposed beneath the cover layer. None of the references to Sauder, French, Smith or Walmer, either individually or in combination, teach this combination of features.

Claim 14: Claim 14 is addressed to a method for using an interchangeable panel modular display system. The system includes a frame having a base and means for supporting a wall panel in an upright position and which means permits insertion and removal of wall panels, where the wall panels comprise different decorative surfaces and decorations are placeable and repositionable on the panels to create differing scenes. None of the references to Sauder, French, Smith or Walmer, either individually or in combination, teach this combination of features.

Claim 19: Claim 19 is addressed to an interchangeable wall panel system including a frame and first and second wall panels slidably mounted into the frame and including first and

Art Unit: 2165

second decorative surfaces. The frame further includes a base and a first and second wall sections positionable in an upright position. The wall sections include grooves for slidably receiving the wall panels. The first and second wall sections are mounted along two adjoining edges of the base. None of the references to Sauder, French, Smith or Walmer, either individually or in combination, teach this combination of features.

Claim 22: Claim 22 is addressed to an interchangeable panel display system. A frame includes four wall sections and four posts. Beams span the posts. Each post has a longitudinal inwardly facing groove and each beam has a slot therethrough in alignment with the grooves in the posts. A base comprises four lower beams spanning the four posts at the lower end. A wall panel is slidably insertable into the grooves. The wall panel includes a decorative cover and a magnetically attractable layer disposed beneath the cover. None of the references to Sauder, French, Smith or Walmer, either individually or in combination, teach this combination of features.

Accordingly, claims 10, 14, 19 and 22 are allowed. Dependent claims 2-7, 9, 11, 15-17, 19-22 and 26-28 are allowed as depending therefrom.
